Message from President

Dear Colleagues,

It's a great honour for me to be the president of Bombay Neuroscience Association for this year. BNA in last few years has grown in leaps and bounds and this position has given me an opportunity to strengthen it further. We now have a greater responsibility on our shoulders as BNA is hosting NSI Annual meeting on 12-15 December 2013 at NCPA and I request each and every member to contribute their services and strengthen the support towards Dr. Suresh Sankhla who is the secretary of both BNA and NSI to make this event a memorable one.

There have been a lot of academic activities every month under BNA and under my leadership I would like BNA to also be involved in creating public awareness in preventing road traffic accidents as well as organ transplants. I would be meeting various authorities in this regard and would request each BNA member to take active participation in various public forum Meetings.

Lastly I would take this opportunity to thank all my executive committee and BNA team members for electing me as president and I hope to receive your continued support to enable all of us to achieve our collective goal.

Nirmal Surya
President

From Secretary's Desk

Dear Colleagues,
Season's greetings !!

It gives me great pleasure to announce the academic program of BNA for this year. Like last year, the first meeting of this year will be held at Hinduja Hospital on June 23rd. The scientific program of this meeting and the meeting schedule of the whole year, as discussed in the annual general body meeting on May 21st, have been included in this newsletter.

The executive committee of BNA would like to extend a vote of thanks to all its members for their undivided support and active participation in academic programs organised by BNA. We, on behalf of BNA, are committed to promote educational programs for our members. To deliver the benefit packages to more and more colleagues, we have plans to accelerate our new membership drive. Moves are also on to invite all those out-stationed colleagues who have either received their speciality training in Mumbai or have practiced in Mumbai for few years. Lastly, educational activities to promote and encourage trainees and younger members, will be given top priority this year. Your inputs and cooperation is extremely important to accomplish this mission.

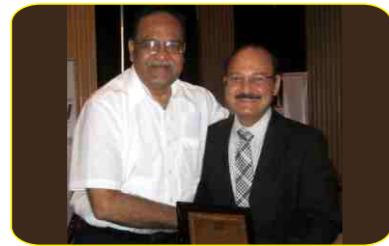

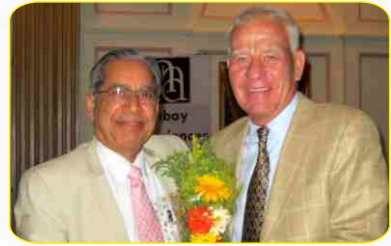

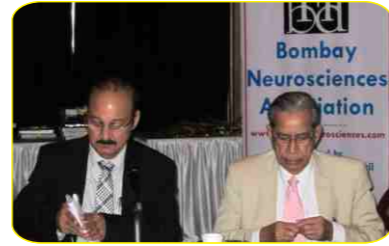

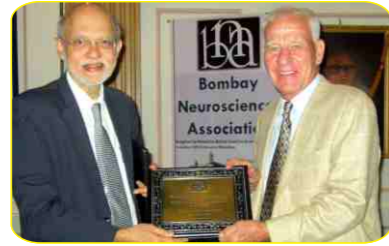

Looking forward to having a great season ahead.

Suresh Sankhla
Hon. Secretary

Monthly Clinical CME/Meetings For The Year 2013-2014

| Sr. No. | Date | Hospital | Coordinators |
